

TEFLON COATING & POLYETHYLENE COATING

High-end Quality, Professional and Powerful Manufacturer

Başak Polyester is a leading industrial coating company specialized in advanced surface technologies. With extensive experience in the chemical and composite industries, we deliver high-performance Teflon coating solutions that enhance durability, reduce friction, and increase resistance to heat and corrosion. Our services also include the **Teflon coating and insulation of acid tanks**, providing superior chemical protection and long-term operational reliability.

What is Teflon Coating?

Teflon coating is a non-stick, heat-resistant fluoropolymer layer applied to metal, glass, and composite surfaces. It creates a smooth, protective film that prevents material build-up, ensures easy cleaning, and extends the lifetime of machinery and components.

Applications

Acid tanks are protected through Teflon coating and insulation.

Industrial molds and equipment.

Food processing Machinery

Textile and plastic production lines

Automotive and mechanical parts

Advantages

Excellent non-stick and low-friction surface High temperature and chemical resistance Enhanced wear protection and long service life

Improved operational efficiency and easy maintenance Quality & Commitment

At Başak Polyester, we are committed to quality, precision, and customer satisfaction. Our Teflon coating process is carried out under strict quality standards to deliver reliable and consistent results for every application.

What is Teflon Coating?

Teflon coating is a type of polymer coating applied to surfaces to reduce friction and provide non-stick properties. The most common type is PTFE (Polytetrafluoroethylene). Properties:

- High temperature resistance (up to 260°C)
- Chemical resistance
- Non-stick surface
- Excellent electrical insulation

Applications:

- Cookware such as pans and pots
- Industrial molds and machinery
- Automotive and aerospace components
- Electrical insulation systems

Advantages:

- Long-lasting performance
- Easy to clean
- Improves energy efficiency
- Reduces friction and wear

We offer customized solutions tailored to specific customer requirements, ensuring products meet unique application needs.

Welcome bosses from all over the world to visit our company!
